Due to notification from Morgan County REA ("MCREA") that grid power is not available for the Ruh State South site, Verdad Resources LLC has revised the production facilities plan to utilize onsite power generation equipment in place of grid-supplied electricity. Because electricity is necessary for production activities at Ruh State South, temporary on location generators will be required.

Operator Comments:

Due to notification from Morgan County REA ("MCREA") that grid power is not available for the Ruh State South site, Verdad Resources LLC has revised the production facilities plan to utilize onsite power generation equipment in place of grid-supplied electricity. Because electricity is necessary for production activities at Ruh State South, temporary on location generators will be required. Due to the lack of available grid power, Verdad is requesting a change to the COAs approved for the Ruh State South oil and gas location. The 2A states, "Operator will use electric equipment and devices (e.g. vapor recovery units or VRUs, fans, etc.) to minimize combustion sources on site (if yes, operator will provide a list outlining which equipment and devices will be electrified)".

A Form 4 will be submitted for any requested documents needed to reflect the equipment change required to power the production equipment onsite rather than with grid power.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
